When It Comes to Securing Urinary Catheters,
There's No Reason to Compromise.

Dale Hold-n-Place® Adhesive Patch

Dale
Always Better

Dale® Hold-n-Place® Adhesive Patch

Simply Secure

No Need to Compromise on Security

Keeping a Foley catheter safe and secure is vital to you and your patient. A secure catheter helps prevent pistoning and accidental dislodgement. It can also reduce the risk of urethral erosion and associated discomfort. Dale Hold-n-Place Adhesive Patches are designed specifically to keep the catheter positioned properly and accommodate each patient. Once the patch is in place, you can be confident the catheter is reliably secure.

No Need to Compromise on Comfort

With Dale Hold-n-Place Adhesive patch, security doesn't have to come at the cost of comfort. Dale Hold-n-Place Adhesive Patches are a one-of-a-kind solution. With a breathable, skin-friendly adhesive, the patches stay secure, but the locking tab can easily be repositioned multiple times without sacrificing performance. And because the ultra-low profile patches don't rely on any hard plastic parts, there's nothing to cause chaffing or irritation.

No Need to Compromise on Convenience

Dale Hold-n-Place Adhesive Patch are ready to go, right from the package. No skin prep is necessary prior to application and no alcohol is needed when removed. Need to reposition the catheter? No problem. User-friendly fastener tabs make it easy. And because one-size fits all, you'll never have to worry about Foley catheter French size or brand.

Secure the Advantages

- Designed with comfort in mind
- Secure, yet skin friendly
- Ultra-low profile with no hard plastics
- Easy to reposition catheter with user-friendly fastener tabs
- One size fits all Foley catheters and male external catheter tubing
- No skin prep needed prior to use
- No alcohol needed when removing
- Helps reduce catheter-associated UTIs
- Readily replaces patches in Foley catheter kits
- Priced to accommodate hospital budgets

Secure Alternative

For patients and practitioners who prefer to secure Foley catheters with a leg band, Dale offers the Hold-n-Place Leg Band. Because it is a Dale Hold-n-Place product, you can be sure it provides security and comfort. Made entirely of a soft stretch material with a supple backing, Hold-n-Place Leg Bands distribute compression evenly around the patient's thigh. And the patented, easy-to-use locking system keeps the catheter in place, while allowing for adjustments whenever needed.

Sample Simplicity

Seeing is believing. We'll help you put the Dale Hold-n-Place Adhesive Patch to the test.
