

IV-ARMOR®

without the IV-ARMOR

with the IV-ARMOR

The flexible protective overlay maximizes IV patency while protecting the site from patient tampering. IV-ARMOR reduces the introduction of infection associated with IV reinsertion.

Key Features

- ◆ Maintains a continuous IV flow.
- ◆ Reduces the number of IV restarts.
- ◆ Can lift to view and assess IV site from top or bottom as needed.
- ◆ Saves nursing time.
- ◆ Allows for patient movement.
- ◆ Reduces downstream occlusion alarms caused by patient movement.
- ◆ Improves patient comfort without the need for a stiff immobilizing device.
- ◆ Protects/preserves IV site.
- ◆ Skin friendly adhesive.
- ◆ Not made with natural rubber latex.

Product #	Description	Quantity
675	IV-ARMOR One size fits most	10/box

HCPCS Code A4221 • Patents dalemed.com/patents

Features	Clinical Advantages
Adhesive Overlay	<ul style="list-style-type: none"> ■ Stretchable: Can lift to view and assess IV site from top or bottom as needed ■ Non-immobilizing: Allows for total range of motion, promoting mobility and healing. ■ Shields the IV site: Keeps IV out of site for needle phobic patients ■ Reduces need for restart by preserving the catheter and extension tubing
Foam Pad	<ul style="list-style-type: none"> ■ Splints IV catheter to minimize mechanical occlusions ■ Reduces catheter downstream occlusion due to kinking and positional IV ■ Decreases IV pump alarms from “false” downstream occlusion ■ Reduces alarm fatigue ■ Provides site protection from bumping on a hard surface
One Size Fits Most	<ul style="list-style-type: none"> ■ Covers all peripheral IV sites: Can be cut to prevent product legs from overlapping
Not Made with Natural Rubber Latex	<ul style="list-style-type: none"> ■ Eliminates patient and caregiver latex reactions preventing latex hypersensitivity
