

PRESS RELEASE- FOR IMMEDIATE RELEASE

Dale Medical Products, Inc. announces the Post-Surgical Compression Bra

April 20, 2026; Franklin, MA – Dale Medical Products, Inc. (“Dale Medical”), a recognized leader in disposable medical products, is proud to announce its latest innovation, the Dale Medical Post-Surgical Compression Bra. This device represents Dale Medical’s commitment to delivering innovative patient solutions designed to meet the evolving needs of patients and clinicians.

The Dale Medical Post-Surgical Compression Bra features a soft, seamless design with multi-directional stretch for enhanced comfort and support. Sewn-in drainage bulb tabs provide a secure method to manage drains directly on the bra. Together, these features deliver the consistent compression and support patients need during recovery from breast and thoracic procedures.

“We are excited that our new Post-Surgical Compression Bras further broaden our portfolio, specifically within Post-Surgical Care. They represent Dale Medical’s ongoing commitment to providing unique solutions that support clinician needs and positive outcomes for their patients” said Bob Simpson, Dale Medical President & CEO.

The Dale Post-Surgical Compression Bras (product Ref. #712, 713, 714, 715, 716) are now available through our distributors worldwide. For more information about the Post-Surgical Compression Bras, please visit the Dale Medical website at www.dalemed.com.

Established in 1961, Dale Medical is recognized as a trusted manufacturer of specialty medical devices that provide high quality, reliable, cost-effective solutions to enhance patient care. As an employee-owned business, we are committed to strengthening our position as a successful market leader through innovation and continuous improvement.
