

FOR IMMEDIATE RELEASE

Dale® Introduces BreezeLock® Endotracheal Tube Holder

Franklin, Mass.—June 1, 2022—

Dale Medical Products, Inc. (Dale), the employee-owned company known for its high quality, patient-friendly medical device securement solutions, is expanding its offering with its new BreezeLock® Endotracheal Tube Holder.

Like the Dale® Stabilock Endotracheal Tube Holder, the new endotracheal tube holder features a soft, comfortable, flexible neckband with no hard plastic parts. The BreezeLock includes a Tube Track for easy repositioning of the endotracheal tube while still allowing easy access to the mouth for oral care.

“Clinicians tell us they appreciate the improved ease of repositioning with the Tube Track and the security of Dale BreezeLock,” says Robert Simpson, President of Dale. “We are pleased to expand the offering with our new endotracheal tube holder to help clinicians provide optimal care for their patients.”

For more information about Dale’s new BreezeLock Endotracheal Tube Holder, or to request a product sample, please visit www.dalemed.com/contact/request-samples or call 800-343-3980.

About Dale

For more than 60 years, Dale has produced specialty medical devices that help make health care better, to save nursing time, improve patient safety and comfort, help reduce infection rates, and provide greater economic value. For more information visit www.dalemed.com.
