

PRESS RELEASE- FOR IMMEDIATE RELEASE

Dale Medical Products, Inc. announces the IV Line Manager

November 2025; Franklin, MA – Dale Medical Products, Inc. (“Dale Medical”), a recognized leader in disposable medical products, is proud to announce its latest innovation, the patent pending IV Line Manager. This device represents Dale Medical’s commitment to delivering innovative patient solutions designed to meet the evolving needs of patients and clinicians.

The IV Line Manager brings clarity and control to one of nursing’s most common safety challenges, IV-line tangling. By securely organizing up to six IV tubing lines into dedicated retention channels, it keeps every line separated, visible, and easy to trace. The result: fewer tangles, less confusion, and greater confidence in every infusion.

“We are excited that our new IV Line Manager further broadens our portfolio, specifically within the IV/Vascular securement category. It represents Dale Medical’s ongoing commitment to providing unique solutions that support clinician needs and positive outcomes for their patients” said Bob Simpson, Dale Medical President & CEO.

The IV Line Manager (product Ref. #630) became available in September 2025 through our distributors worldwide. For more information about the IV Line Manager, please visit the Dale Medical website at www.dalemed.com.

Established in 1961, Dale Medical is recognized as a trusted manufacturer of specialty medical devices that provide high quality, reliable, cost-effective solutions to enhance patient care. As an employee-owned business, we are committed to strengthening our position as a financially successful market leader through innovation and continuous improvement.
